

SE-Overview of It Industry

Name: Goswami Mansi

1. What are the three main layers of software architecture? Write one line about each.

Ans. Presentation Layer (UI Layer) – Displays information to users and accepts user input.

- Business Logic Layer – Processes data and handles application rules and logic.
- Data Layer – Stores, retrieves, and manages data from databases.

2. Define client and server in your own words with one real-life example.

Ans. Client – A device or application that requests services or information.

- Server – A computer or system that provides services or information to clients.

Example: When you open YouTube on your phone, your phone acts as the client and YouTube's system acts as the server that sends videos to your device.

3. Write 2 differences each between desktop apps, web apps, and mobile apps.

Ans. Desktop Apps:

1. Installed directly on a computer.
2. Can often work without an internet connection.

Web Apps:

1. Run in a web browser.
2. Usually require an internet connection.

Mobile Apps:

1. Designed for smartphones and tablets.
2. Can use device features such as camera and GPS.

4. Name any 3 databases and mention whether each is SQL or NoSQL.

Ans. MySQL – SQL Database

- PostgreSQL – SQL Database
- MongoDB – NoSQL Database
